

# Welcome Back

We are all so excited that you are coming back to school next week. It has been such a long time since we heard your laughter in our corridors and saw your smiley faces. Somethings have changed in our school whilst you have been learning at home.

We want to keep everyone safe, there will be things that are really unfamiliar to you. When you arrive at school you will see the adults wearing face masks and visors, this is so that they don't pass on germs to you and you don't pass any germs onto them.

*This is what Mrs Hooper will look like.*

Your classrooms have changed too. They have arrows on the floors to show you which way to walk around and you all have your very own workstation with new resources for you to use to support your learning. In the corridors you will see arrows showing you which way to walk. There are circles on the floor to show you where to stand so that you are not too close to your friends. Social distancing is one of the ways we can all help each other to stop the spread of the Coronavirus. *Here is a picture to show you what the classrooms look like.*

## OUR SPECIAL LEARNING BUBBLE

As we return to classrooms  
To draw and read and write,  
There's still a sneaky virus  
That lurks just out of sight.

It clings to sticky fingers  
And can spread throughout the air.  
So, we must use some caution  
And take some extra care.

There's one thing that we can do,  
At first, it will be strange.  
A brand-new way of working  
That's just a little change.

We'll get into our bubbles;  
Our little learning teams.  
If we stick in our bubbles,  
Then school will be a dream!

We'll work and play together  
In our own learning place.  
We'll use our own equipment  
And keep it in our own space.

We'll use a special bathroom  
and keep our small hands clean.  
We'll wash with soap and water  
Until no dirt is seen.

We'll play out in the playground  
While keeping far apart.  
But we won't share equipment  
Because we're being smart.

Our special learning bubbles  
Will keep us safe and sound.  
If we do this together,  
The germs won't stick around.
